Rasadari Ranasinghe

Data Analyst | SQL | Python | Tableau | Salesforce

Toronto, ON | (647) 510-9744 | rasadariravihari@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

- Data Analyst with 4+ years of experience across data analysis, ESG, banking operations, and university research support, including data cleaning, validation, and reporting.
- Query, clean, and report on data using SQL, Python (Pandas, Scikit-learn), PostgreSQL, Tableau, Excel (PivotTables, lookups), and Salesforce CRM to turn raw records into reliable insights.
- Build Tableau dashboards, ETL workflows, and data quality checks and document data standards, so teams can reuse them and trust the data.
- Explain findings clearly to non-technical audiences, using attention to detail to learn new domains quickly across labour-market, ESG, and banking data.

PROFESSIONAL EXPERIENCE

ESG Coordinator | Vosyn Inc. | Toronto, ON / Remote **May 2026 - Present**

- Collect, clean, and validate sustainability, policy, and funding data using AI tools, working closely with the team to give SDG use case benchmarking consistent inputs.
- Build and maintain Excel trackers with standardized structures and data-quality checks to keep analysis consistent and errors easy to catch.
- Translate ESG findings into stakeholder-ready reports using Google Slides for easy review.

Operations Assistant | People's Bank | Sri Lanka **August 2023 - December 2024**

- Analyzed account information for management review with close attention to detail, identifying discrepancies and verifying accuracy so decisions rested on correct data.
- Prepared 3 to 4 branch operations reports per month and maintained confidential client records, giving management current information while protecting client privacy.
- Reviewed KYC documentation and kept account data accurate in the banking database and Excel.
- Served 20 to 30 clients per day by inquiry and call, following up to keep them informed.

Teaching Assistant and MSc Coordinator | University of Colombo | Sri Lanka **August 2022 - August 2023**

- Delivered lectures and practical sessions on statistics, ArcGIS, Minitab, and IBM SPSS to 200+ BSc and MSc students, explaining concepts clearly so they could apply them.
- Coordinated MSc program scheduling, records, and reporting and supported GIS research.

PROJECTS

Youth Workshop Gap Analysis (DA-37, Volunteer Project for U+ Education)
Excel | Data Cleaning | Gap Matrix

- Standardized 38,168 recreation and 3,306 library program records from Toronto open data into one inventory, correcting a placeholder maximum age (120) in 14,220 rows.
- Built a gap matrix across nine topic categories that showed public speaking as the clearest opportunity, and recommended three workshop pilots for U+.

AI Concierge Agent (Roomie, Personal Project)
Salesforce Agentforce | Salesforce Flow | Data Modeling

- Designed and built an AI concierge agent in Salesforce Agentforce for customer onboarding, room booking, and food ordering, with Autolaunched Flows that validate each customer before any booking or order is created.

Crowdfunding ETL and Database Analysis
Python | Pandas | PostgreSQL | SQL

- Built an ETL pipeline that cleaned raw campaign data into four normalized tables in a PostgreSQL database designed from an ERD, so campaign, category, and contact data can be queried consistently with SQL.
- Extracted 1,000 campaign and 1,000 contact records from Excel into 9 categories and 24 subcategories.

Belly Button Biodiversity Interactive Dashboard
JavaScript | D3.js | Plotly | JSON

- Built an interactive dashboard (JavaScript, D3.js, Plotly) exploring microbial species (OTU) data for 153 individuals from a JSON dataset: top 10 OTU bar chart, bubble chart, and metadata panel, all updating from a dropdown selection.

Retail Orders Data Processing and SQL Analysis
Python | SQL | PostgreSQL | SQLAlchemy

- Cleaned a 9,994-order Kaggle retail dataset in Python, engineering sales price and profit fields, then loaded it into PostgreSQL and ran five SQL analyses, including top revenue products, top products per region, and 2022 vs 2023 sales growth.

TECHNICAL SKILLS

Programming Languages: SQL, Python (Pandas, NumPy, Scikit-learn, Matplotlib, Plotly, Flask, SQLAlchemy)

Data Analysis: Data cleaning, transformation and validation, EDA, ETL, statistical analysis, hypothesis testing, regression

Databases: PostgreSQL, MongoDB/NoSQL

Visualization and Reporting: Tableau, Looker, Excel (PivotTables, LOOKUPs, INDEX-MATCH, slicers), KPI reporting

Software, Applications, Tools: Salesforce, Microsoft Office, Google Workspace, Git/GitHub, IBM SPSS, Minitab, ArcGIS

EDUCATION & CERTIFICATIONS

Data Analytics Certificate (A+) | University of Toronto School of Continuing Studies | Toronto, ON **October 2024**

B.Sc. (Honours), Environmental Sciences | University of Colombo | Sri Lanka **2022**
First-Class Honours, GPA 3.77/4.30

- Relevant Courses: Biostatistics, Introduction to Computing, Fundamentals of Programming
- Projects: Urban wetland land use and land cover study, Urban Ecosystems (2025)

Deloitte Australia Data Analytics Job Simulation, Forage - 2026 | **Salesforce Agentforce Specialist, Salesforce** - 2025 | **Master Star Volunteer Award (Data Analysis), York Region Educational Services**

VOLUNTEER EXPERIENCE

Data Analyst | U+ Education | Toronto, ON / Remote **April 2026 - Present**

- Lead dashboard and data model development for DA-42 (Volunteer-to-Career Intelligence Platform), analyzing 147,000+ Canadian Job Bank records to surface labour-market and occupation trends.
- Build and maintain a four-page Tableau dashboard covering Jobs by NOC Category, Jobs by Province, Average Wage by Occupation, and Partner Prospects so the team can explore the findings visually.
- Clean and validate data with Python/Pandas and SQL to flag missing values and duplicates.
- Apply the NOC 2021 taxonomy to standardize 1,000+ fragmented job titles for consistent reporting.

AI Product Developer | GQ Consultancy Inc. | Toronto, ON / Remote **May 2025 - April 2026**

- Developed Salesforce solutions with custom objects, validation rules, and automation flows to support CRM and business workflows, collaborating with business and technical teams.
- Tested workflows against business requirements and documented configurations and results to catch issues and confirm expected functionality before release.
